

WHAT DOES AESOP MEAN FOR TECHNOLOGY PROFESSIONALS?

ACTUALLY, **NOTHING**

Finally, a technology solution that doesn't make your job any harder. So, relax.

Automated Substitute Placement & Absence Management
Selected by more districts than all other systems combined

WHAT DOES AESOP MEAN FOR TECHNOLOGY PROFESSIONALS?

Actually, nothing.

While you want the best technology for your district, the last thing you need as a busy IT manager is more hardware and software to install and maintain. To bring you the best of technology without the IT burden, we developed Aesop.

As we've worked with hundreds of school district technology professionals, we've listened to your concerns. Here are some of the common ones:

"We need a simple substitute placement system that requires little or no support by the district." Aesop is deployed in a SaaS model, with no hardware, software or phone lines installed at the district. Users access Aesop from web browsers or touch-tone phones—anytime, anywhere. Aesop is transparent on the network and will not increase your tech support case load.

"We are concerned about data security and system reliability." Since we share your commitment to security, Aesop incorporates carrier-class, enterprise-grade firewalls, encryption, and intrusion-detection systems. To ensure maximum availability (99.99% uptime!), Aesop is hosted in two redundant world-class data centers with fault-tolerant and redundant mechanisms, automatic monitoring, error notification, burstable bandwidth, and seven days of diesel power backup.

"We want state-of-the-art systems that don't require expensive upgrades." Not only did we pioneer and patent the internet technology for substitute placement, but Aesop's multitenant architecture is also the most mature and functionally rich system available. We routinely deploy new features suggested by customers to our entire client base simultaneously at no cost and without the disruption of a hardware or software upgrade.

"Our vendors must have a proven history of customer satisfaction." With 10 years of experience as a Software-as-a-Service provider, Aesop now serves more than 2,000 school districts worldwide. More than 300 districts have switched to Aesop from other systems—and not one has ever switched back. Our dedicated and experienced customer support team provides knowledgeable and accessible service to our entire family of districts.

For IT professionals, Aesop means efficient substitute placement with no extra burden on your department.

To learn more about how Aesop could work in your district, please visit www.AesopEducation.com or call us at **1.866.574.9169** at your earliest convenience.

"We decided to take advantage of this technology, which uses both telephone and internet, as a way to improve our school system. Aesop is a great example of new technologies that really do help."

• WHAT IS AESOP?

Aesop is an automated substitute placement and absence management service that uses an integrated phone and web system. Unlike traditional sub-calling systems, Aesop's Software-as-a-Service model does not require any hardware or software at the district office. Users simply log in via the web or phone anytime, anywhere. Aesop not only saves countless hours of manual sub-calling, but also offers efficient absence tracking and reporting.
